SIWERTELL SHIP UNLOADER - USA

IMPROVED CARGO REACH WITH SPECIAL FEATURE

The delivery of a Siwertell continuous screw-type ship unloader and a screw conveyor system to RMC Pacific Materials is part of a solution for discharging and conveying cement to a storage and distribution facility in the port of Redwood City.

About

The ship unloader is pedestal-mounted on a concrete deck. It is equipped with a reach extender for improved reach in the ship's cargo hold.

A clean-up unit is attached to the vertical conveyor at the end of the unloading procedure in order to increase the efficiency of the clean-up operation.

The jetty conveyors include a horizontal screw conveyor of 45m, for the transfer of unloaded cement to the shore based receiving system, and two vertical conveyors. The electrical system is installed according to US standards.

FACTS

CATEGORIES:

- **Ship Unloading**

MATERIALS:
