SERVICE SOLUTIONS FOR WOOD PROCESSING EQUIPMENT

MAXIMIZING EQUIPMENT RELIABILITY, MINIMIZING MAINTENANCE COSTS

We offer planned, on-demand and emergency service solutions for our range of wood-processing technology. This ensures maximum equipment availability and performance, a reduction in maintenance costs, and an extended service life.

Our wood-processing equipment, including stationary and mobile machinery, is well-known for its quality, reliability and service longevity. It is often critical to operations; therefore, good maintenance management and timely servicing is essential.

SERVICE AGREEMENTS

Your operations and the level of servicing that you require, dictates the service agreement that best meets your needs. Through inspections, fit-for-purpose support and service packages, we help you maximize equipment reliability and safety, optimize performance and minimize costs. This allows you to focus on your core business objectives.

SPARE & WEAR PARTS

Timely access to quality spare parts and wear parts is essential to ensuring uninterrupted operations, and the optimal performance of your wood-processing technology. As well as supplying high-quality, original equipment manufacturer (OEM) spare parts, we offer equipment-specific recommendations and reviews of your parts inventories.

MAINTENANCE & INSPECTIONS

A proactive approach to maintenance is key to ensuring equipment reliability and safety, while minimizing through-life operational costs. Our experts can provide guidance on the best approach to service, perform inspections to identify any problem areas, and offer tailored recommendations for maintenance, spare parts, or remedial measures. Our expert technicians

undertake any agreed preventative or corrective maintenance tasks and can also supervise your maintenance personnel.

MODIFICATIONS & RETROFITS

Our vast experience in optimizing material flows and throughput can help you take your operations to the next level. This includes our modification and retrofit solutions, which are a cost-efficient way to extend the service life of existing equipment. They protect your initial investment, and ensure your equipment's continued reliability, safety, energy efficiency, and performance.

SUPERVISION & CONSULTANCY

If you are planning or carrying out a new installation project, anything from a single machine to a complete production line, our experts are on-hand to provide supervision and consultancy services. We can also assist with maintenance projects or help to optimize equipment performance or throughput.

TRAINING

We offer training packages to provide your operators with the necessary skills to use your wood-processing equipment effectively and safely, and equip your maintenance personnel with the knowledge that they require to keep your equipment running smoothly.
