SUSTAINABILITY INITIATIVES

At Bruks Siwertell, we are committed to reaching our 2030 targets, and will continuously communicate to our stakeholders how these targets will be met and what is achieved. Therefore, on this page we publish case stories that detail different sustainability initiatives taken within the Group.

Environmental, Social and Governance (ESG) is the framework we use to evaluate our sustainability and ethical impact. Each case below is marked with Environmental, Social, or Governance, to indicate which ESG criteria and focus area the initiative contributes towards.
