WE TAKE WORLDWIDE SERVICE ONE STEP FURTHER

Most dry bulk operators value effective maintenance programs. With a service agreement, we take as much responsibility for your bulk equipment as you need us to.

We support you with service, maintenance and related administration, providing high equipment availability and leaving you free to focus on your core business. The service agreement is tailored to your requirements by adding the services you need.

TECHNICAL SERVICES

Service agreement is tailored to a customer's needs and its in-house skills:

- Inspections
- Maintenance supervision
- Scheduled, preventive maintenance
- Condition-based, predictive maintenance
- Repairs & corrective maintenance

TRAINING

Service agreement includes training programmes designed to improve competence levels and maximise an operator's return on investment.

- Operator training
- Unloading efficiency study
- Maintenance training
- Safety training

SPARE PARTS

Service agreement offers management and inventory services for spare parts.

- Spare parts management
- Inventory management

AVAILABILITY MANAGEMENT

Service agreement includes a full range of professional management services aiming to improve equipment efficiency.

- Phone support
- Remote PLC-support
- Maintenance planning

OPERATIONS

Service agreement handles your entire maintenance requirements and full equipment operation.

- Operation of equipment/terminal
- Management of terminal's maintenance requirements
