PLANNED MAINTENANCE IS MUCH CHEAPER THAN UNPLANNED

Bruks Siwertell equipment is recognized worldwide for reliability and long service life. Contracting us to service and maintain your equipment ensures that it always meets the latest performance and safety standards and delivers maximum efficiency.

When you have a proactive approach to maintenance you will have fewer breakdowns. Service labor and spare parts can be planned well ahead of critical replacement dates, reducing costs. Wear and tear can be attended to in a timely manner instead of leading to breakdowns.

Most operators value effective maintenance programs and a growing number are taking advantage of the benefits offered by planned maintenance and serviceagreements.

18 YEARS OF DAILY OPERATIONS

Despite its location in the middle of the rain forest, with adverse conditions such as high humidity, strong sunshine and high winds, the equipment has proved to be very robust, giving Hermasa confidence that it will have along service life, says Terminal Supervisor Jander Santos.

EXPERT ATTENTION MINIMIZES DOWNTIME

Until Bruks Siwertell was called in for specialist assistance with the bearing replacement, Akcansa had carried out its own maintenance procedures, but this is about to change. "From now on we want to benefit more from the expertise of Bruks Siwertell and we will request a periodic check every year," says Ozan Kirkgöz, Akcansa Mechanical Maintenance Supervisor.
