A GLOBAL LEADER IN BULK HANDLING AND WOOD PROCESSING SOLUTIONS

We design, produce and deliver systems for loading, unloading, conveying, storing, and stacking and reclaiming dry bulk materials, alongside equipment for chipping, composting, screening, shredding, milling, recycling, and processing wood for the biofuel, bioenergy, panelboard, sawmill, pulp and paper industries.

With thousands of installations worldwide, our machines handle your raw materials from forests, fields, quarries and mines, maintaining critical supply lines for manufacturers, mills, power plants and ports. All solutions are designedto ensure environment-friendly, efficient, and profitableoperations.

We are global and local. You will find our main offices in the Europe, North America, and Asia, supported by a dedicated network of hundreds of representatives and dealers worldwide.

VISION

Our vision is to be the market-leading technologygroup in dry bulk materialhandling and processing for theport, wood and forestry industries.

BUSINESS IDEA

To develop, design, produce and deliver productsand services that offer the best material handling and processing technology for theglobal port, wood and forestry markets.Through our commitment to understanding customer needs and industry knowledge, we create innovative solutions that meet the highest demands for efficiency, reliability and performance.

STRATEGY

Bruks Siwertell's strategy for 2022 to 2026 is to build a market-leading group in dry bulk handling through the profitable growth of all our industry segments worldwide. This growth will be driven by innovation from people, products and processes.

Profitable growth will be underpinned by a strategic focus on continuously developing a customer-driven product portfolio and our absolute commitment to service. Service is key for all customers, both existing and new, and our service strategy will be developed in balance with their needs.

The company was founded with a shared dedication to innovation and quality. The growth and development of our people, products and processes will remain true to this spirit. New digital technologies that provide real-term benefits for customers will be pursued, along with our continuous commitment to social, environmental and financial sustainability.

COMPANYVALUES

Our company values strongly define the way we do business, our working culture and intentions.As a result, we are more likely to make the right decisions - the decisions that help us achieve the company's vision and goals.

THE SIWERTELL STORY

For over forty years Siwertell screw-type unloaders have provided the world's cleanest, most efficient dry bulk unloading performance, along with very high capacities. This impressive legacy is carried forward by our commitment to continuous development. Our current capabilities meet and often exceed the market's growing demands for increased efficiency and minimal environmental impact.

THE BRUKS STORY

Bruks' history is rooted in innovation. Bruk means industrial operation in Swedish, and its name was suitably applied to a farming family's venture in Hälsingland, Sweden, in the 17th century, when it built a hydro power station and turned the farm into an industry with a saw mill and brickyard.

WHISTLEBLOWING

Bruks Siwertell Group's aim is to conduct business in a long-term, sustainable way. We are dedicated to ensuring that irregularities that could seriously damage the Group, our companies, or our personnel are highlighted and investigated as early as possible. We have developed a whistleblowing policy to make it easier for those who wish to provide information about irregularities that are in breach of applicable legislation. All reports are received and handled by an external agent. It is always Bruks Siwertell Group who ultimately assesses the report and decides what measures are to be taken.

Please note that only persons directly connected to Bruks Siwertell Group's operations are protected by the whistleblowing provisions, which are set out in the Protections for Persons Reporting Irregularities Act (SFS 2021:890).
