Flat storage systems

A flat storage offers low capital cost and quick installation compared to conventional silos. Each system is tailormade to fit an existing or new storage building. The loading and unloading systems can be manual, semi-automatic or fully automatic.

Siwertell supplies individual components or turn key installations including ship unloading and ship loading, truck/railcar loading and unloading and packing plants. Siwertell has a wide experience in flat storage systems with installations worldwide, for storage of 5,000 to 70,000 tonnes.
